

The Centre for Geoinformatics Technology at the Department of Studies in Geography is conducting a two day workshop (21st and 22nd November 2025) on the topic of 'Geoinformatics and Land Surveying Technologies' under the "GIS for

Educators” program, sponsored under RUSA. The workshop is to cover the theoretical and hands-on experience of using advanced land surveying techniques such as the use of Total Station, GPS, and Drones.

The inaugural program began at 11 am. The welcome speech was delivered by Professor P. Jayashree addressing the gathering about the importance of the subject matter of the workshop and its benefits to all present. The programme was inaugurated by Mrs. Savitha M K , Registrar, University of Mysore, who emphasised the role of hands-on learning and GIS in the world today. Our chief-guest today was Dr. Suresh Chitrapu, the Managing Director of Atlashine Pvt Ltd. He urged the students to take inspiration from the capabilities of GIS in the modern world. Prof Ramu connected with the students and urged them to take the opportunity to learn hands-on. Finally, Prof Chandrashekara in his presidential speech reminded that curiosity of space is what led to field of surveying, encouraging everyone to be curious, as there is more to learn in the modern field of surveying.
