UNIVERSITY OF MYSORE

Vishwavidyanilaya Karyasoudha Crawford Hall, Mysuru- 570 005 Dated: 15.06.2018

No.AC.2(S)/31/18-19

#### NOTIFICATION

Sub: Revision of syllabus for Sericulture (UG) as per CBCS pattern from the academic year 2018-19.

Ref: 1. Decision of Board of Studies in Sericulture (UG) meeting held on 3.3.2018.

- Decision of the Faculty of Science & Technology Meeting held on 21.04.2018.
- 3. Decision of the Deans Committee meeting held on 22.05.2018.

The Board of Studies in Sericulture (UG) which met on 03<sup>rd</sup> March, 2018 has recommended to revise the syllabus for B.Sc. Sericulture as per CBCS pattern from the academic year 2018-19.

\*\*\*\*\*

The Faculty of Science and Technology and the Deans committee meetings held on 21-04-2018 and 22-05-2018 respectively have approved the above said proposal with pending ratification of Academic Council and the same is hereby notified.

The CBCS syllabus of B.Sc. Sericulture course is annexed. The contents may be downloaded from the University Website i.e., <u>www.uni-mysore.ac.in</u>.

Draft approved by the Registrar

**Deputy Registrar(Academic)** 

To:

1. The Registrar (Evaluation), University of Mysore, Mysore.

2. The Dean, Faculty of Science & Technology, DOS in Physics, Manasagangotri, Mysore.

3. The Chairperson, BOS in Sericulture, DOS in Sericulture, Manasagangotri, Mysore.

4. The Chairperson, Department of Studies in Sericulture, Manasagangotri, Mysore.

5. The Director, College Development Council, Moulya Bhavan, Manasagangotri, Mysore.

6. The Principals of the Affiliated Colleges where UG Program is running in Science stream.

7. The Deputy/Assistant Registrar/Superintendent, AB and EB, UOM, Mysore.

8. The P.A. to the Vice-Chancellor/Registrar/Registrar (Evaluation), UOM, Mysore.

9. Office file.

## UNIVERSITY OF MYSORE Syllabus of SERICULTURE as an Optional in B.Sc. Programme (CBCS & CAGP) I SEMESTER

# DSC – (SER) A: BIOLOGY OF MULBERRY AND SILKWORM

# Theory

1. Introduction to Sericulture-Origin and history of Sericultu of Sericulture to Europe, South Korea, Japan, India and ot	re- Silk road, spread		
of Sericulture to Europe, South Korea, Japan, India and ot		4 hrs.	
2 Geniersteine aus of Latie 1 W 11 C	-		
2. Sericulture map of India and World. Components of Seric	ulture.	2 hrs.	
3. Sericultural practices in tropical and temperate climate.		2 hrs.	
4. Employment generation in sericulture- Role of women in	sericulture.	2 hrs.	
5. Textile fibres: Types- natural and synthetic fibres- type India and their importance.	s of silk produced in	2 hrs.	
6. Sericultural practices in rain-fed and irrigated conditions traditional areas.	; traditional and non-	4 hrs.	
Unit -2			
7. Sericulture organization in India and Karnataka; role of Sericulture, Central Silk Board, Universities and M development.		2 hrs.	
8. Salient features, economic importance of the	family Moraceae.	4 hrs.	
Phytogeography and systematics of the genus <i>Morus</i> Botanical description of mulberry.	L. and its species.		
9. Morphology of mulberry: different cultivars of mulberry to Karnataka.	-	4 hrs.	
Floral biology of mulberry: Structure of male and female f			
10. Anther and ovule in mulberry; micro- and megasporogen male and female gametophytes; pollination, fertilizat	ion; development of	6 hrs.	
endosperm, embryo and seed; polyembryony and parthen	ocarpy in mulberry.		
Unit -3			
11. Anatomy of mulberry: internal structure of stem, root, per secondary growth in root and stem. Structure and organiza meristems.		6 hrs.	
12. Weeds of Mulberry garden, classification, characteristics,	effect on crop plants.	2 hrs.	
Weeding methods- Integrated weed management.	1 1		
13. Characteristic features of the order Lepidoptera; detailed Saturnidae and Bombycidae. Classification of sericigenou	2	4 hrs.	
14. Classification of silkworms based on moultinism, voltin distribution; popular silkworm breeds and hybrids of Karr	ism and geographical	4 hrs.	
traits.			
Unit -4			
15. Life cycle of <i>Bombyx mori</i> ; morphology of egg, larva, pup		$\frac{4 \text{ hrs.}}{8 \text{ hrs}}$	
16. Morphology and anatomy of digestive, circulatory, e nervous system of silkworm larva.	xcretory, respiratory,	8 hrs.	
17. Morphology and anatomy of reproductive systems of silk i	noth.	2 hrs.	
18. Morphology and anatomical structure of Silk gland		2  hrs.	

# DSC – (SER) A: BIOLOGY OF MULBERRY AND SILKWORM

Practical 16 Practicals of 4 hr		
1.	Sericulture maps: (a) World maps and Silk Road.	
	(b) Sericulture map of India and Karnataka.	
2.	Preparation of histograms and pie charts on:	2 Prac.
	(a) Production of textile fibres in India.	
	(b) World silk production.	
	(c) Pie chart on mulberry and non-mulberry silk production in India.	
3.	Taxonomic description of mulberry.	1 Prac.
4.	Study of five popular mulberry cultivars of Karnataka (Mysore local, K <sub>2</sub> , S <sub>36</sub> ,	1 Prac.
	$S_{13}$ and $V_1$ )	
5.	Mounting of Pollen grains, Ovule and Embryo.	1 Prac.
6.	Anatomy of petiole, leaf lamina, stem and root.	2 Prac.
7.	Weeds of mulberry garden.	1 Prac.
8.	Life cycle of <i>Bombyx mori</i> - Morphology of egg, larva, pupa and adult of	1 Prac.
	Bombyx mori.	
9.	Sex separation in larva, pupa and adult of the silkworm <i>Bombyx mori</i> .	1 Prac.
10.	Dissection and display of:	5 Prac.
	(a) Digestive system of larva. (b) Silk glands.	
	(c) Reproductive system of male and female moths.	
	(d) Mounting of larval mouth parts and spiracle.	
	(e) Nervous system of silkworm larva.	

#### **SCHEME OF PRACTICAL EXAMINATION**

Duration-3 hrs.		Max. Marks - 40			
Q 1. Taxonomic description of any one of the popular mulberry cultivars					
(Mysore Local, M5, S36, V1, S13, G4, etc.,)		- 12 marks			
Note: Distribution of marks					
a) Identification of the variety	- 2				
b) Diagnostic features	- 6				
c) Sericultural importance	- 4	OR			
Sectioning and Mounting of Petiole / Leaf Lan	nina / St	em / Root.			
Note: Distribution of marks					
a) Preparation	- 6				
b) Identification	- 2				
c) Features and labeled diagram	- 4				
Q 2. Any one of the following:		- 12 marks			
Male / Female reproductive system / Silk gla	nds / Di	igestive system / Nervous system /			
Sex separation at larval / Pupal / Moth stage.					
Note: Distribution of marks					
a) Dissection / Sex separation	- 8				
b) Labeled diagram with description	- 4				
Q 3. Identify and comment on A, B, C, D and E.		- 10 marks			
Any FIVE from the practical syllabus.					
Q 4. Viva-voce.		- 6 marks			

# **II SEMESTER**

# DSC – (SER) B: MULBERRY CULTIVATION AND SILKWORM REARING

# Theory

# 4 hrs/week x 16 weeks = 64 hrs.

.

	Unit- 1	
1.	Definition of soil, soil structures, soil textures and soil profile.	3 hrs.
2.	Types of soils in India, soil conservation methods.	3 hrs.
3.	Importance of soils fertility with reference to mulberry cultivation; soil analysis- soil	3 hrs.
	sampling, soil pH, organic carbon and NPK level.	
4.	Propagation of mulberry- seedling, sapling, grafting and layering.	3 hrs.
5.	Establishment of mulberry garden: Areas under mulberry cultivation in India, Species	4 hrs.
	and Varieties under cultivation in India, General Descriptions, Climatic requirements,	
	Soil conditions, mulberry cultivation under rain-fed and irrigated conditions, mulberry	
	cultivation in hilly areas, mixed forming. Special references to tree plantations.	
	Unit- 2	
6.	Raising of commercial nursery; Application of root inducing hormones	2 hrs.
7.	Introduction to different types of Manures and fertilizers: Biofertilizers, Foliar	6 hrs.
	nutrition, Plant nutrients (macro and micro nutrients), composting, vermicomposting	
	and Plant Hormones.	
8.	Intercultivation and Mulching practices: Purpose, methods, time and frequency.	2 hrs.
9.	Irrigation: Importance, Source, methods, periodicity and quantity of irrigation, over-	2 hrs.
	irrigation and its effects.	
10.	Leaf harvesting: harvesting methods (leaf and shoot harvests); transportation and	2 hrs.
	preservation of harvested leaf and shoots. Prunning- Objectives, Importance and	
	methods.	
11.	Estimation of leaf yield: Importance of leaf quality.	2 hrs.
	Unit- 3	
12.	Rearing house: Location, orientation, plan and utilities; model rearing house; low-cost	3 hrs.
	rearing house.	
13.	Rearing appliances-shelf and shoot rearing; requirements of rearing appliances (per	3 hrs.
	unit rearing of 100 dfls).	
14.	Disinfection of rearing house and rearing appliances; disinfectants (formalin, bleaching	3 hrs.
	powder, chlorine dioxide, slaked lime and iodine compounds); rearing and personal	
	hygiene.	
15.	Selection of silkworm races/breeds for rearing- advantages and disadvantages of	3 hrs.
	bivoltine and multivoltine pure races/ breeds and hybrids.	
16.	Incubation- definition, requirement of environmental conditions, incubation devices;	4 hrs.
	identification of different stages of development; black boxing and its importance.	
	Unit- 4	
17.	Chawki rearing: Preparation; brushing and its methods; types of chawki rearing -	5 hrs.
	traditional and improved method; optimum environmental conditions; methods and	
	frequency of feeding; methods of bed cleaning; spacing; moulting and care during	
	moult.	
18.	Late age silkworm rearing: Methods; optimum environmental conditions; feeding	5 hrs.
	quantity and frequency; methods of bed cleaning; spacing; moulting and care	
	during moult.	
19.	Identification of spinning larva; spinning; mounting and mounting density; types of	3 hrs.
	mountages, their advantages and disadvantages; environmental requirements during	
	spinning.	
20.	Harvesting: Time of harvesting; sorting, storage/ preservation, packaging and	3 hrs.
	transport of cocoons; leaf-cocoon ratio; maintenance of rearing records.	

# DSC – (SER) B: MULBERRY CULTIVATION AND SILKWORM REARING

# Practical

# 16 Practicals of 4 hrs. each

1.	Determination of soil pH and water holding capacity.	1 Prac.
2.	Farm implements.	1 Prac.
3.		1 Prac.
	Preparation of land, pits and rows; preparation of rooting media (fieldwork).	
4.	Raising of sapling and seedling (field work).	2 Prac.
5.	Intercultivation, mulching, irrigation, pruning and estimation of leaf yield.	2 Prac.
	(Demonstration and exercise).	
6.	Grafting and Layering in mulberry.	2 Prac.
7.	Harvesting and preservation techniques; leaf selection for different instars.	1 Prac.
8.	Rearing houses- model rearing house and low-cost rearing house.	1 Prac.
9.	Rearing appliances.	1 Prac.
10.	Disinfection- Types of disinfectants- concentration and dosage requirement;	1 Prac.
	preparation of spray formulation of disinfectants.	
11.	Incubation of silkworm eggs- Methods; black boxing; maintenance of	1 Prac.
	temperature and	
	humidity;	
12.	Brushing: Methods; chawki rearing; use of paraffin paper and blue	1 Prac.
	polythene sheet. Bed cleaning: use of bed cleaning net and disposal of bed	
	refuses and silkworm litter.	
13.	Moulting: Identification of moulting larva, care during moulting; mounting	1 Prac.
	and mounting density; harvesting of cocoons; assessment of cocoons; types	
	of mountages; Maintenance of records for silkworm rearing.	

## **SCHEME OF PRACTICAL EXAMINATION**

<b>Duration-3 hrs.</b> Q 1. Determination of soil pH / water holding capacity / grafting / layering	Max. Marks - 40 g 10 marks
Note: Distribution of marks	g To marks
a) Procedure - 2	
b) Labelled diagramme / Calculation - 3	
c) To conduct Experiment - 5	
Q 2. Calculations and procedure about disinfection/ brushing/ bed cleaning	g/ hatching
Percentage.	- 10 marks
Note: Distribution of marks	
a) Procedure/Description - 5	
b) To conduct Experiment - 5	
Q 3. Identify and comment on the spots A, B, C, D and E.	
Any FIVE from the practical syllabus.	- 10 marks
Q 4. Submission of field work / visit report.	- 5 marks
Q 4. Viva-voce.	- 5 marks

## **III SEMESTER**

# DSC – (SER) C: MULBERRY AND SILKWORM CROP PROTECTION

# Theory

Unit-1				
1.	Introduction to plant diseases and importance of plant protection.	1 hr.		
2.	Classification of mulberry diseases.	1 hr.		
3.	Influence of biotic and abiotic factors on the incidence of plant diseases	1 hr.		
4.	Mineral deficiency symptoms in mulberry	3 hrs.		
5.	Fungal diseases of mulberry: Occurrence, symptoms, etiology and preventive	5 hrs.		
	and control measures of the following diseases :			
	(a) Powdery mildew. (b) Leaf spot.(c) Leaf rust.(d) Leaf blight.(e) Root rot.			
6.	Root-knot disease of mulberry- occurrence, life cycle, symptoms, preventive	1 hr.		
	and control measures.			
7.	Viral, bacterial and dwarf diseases of mulberry- their occurrence- symptoms	4 hr.		
	and preventive and control measures.			
	Unit-2			
8.	Pest: Definition; pest outbreak; pest forecasting.	3 hrs.		
9.	Major pests: leaf roller, Bihar hairy caterpillar, mealy bug and thrips – life	4 hrs.		
	cycle, nature of damage and their preventive and control measures.			
10.	Minor pests: girdlers, termites and mites- life cycle, nature of damage and	6 hrs.		
	their preventive and control measures.			
11.	Pesticides: Forms, formulations, calculation and application.	3 hrs.		
Unit-3				
12.	Introduction; classification of silkworm diseases.	1 hr.		
13.	Protozoan disease – symptomatology, structure of pebrine spore, life cycle of	3 hrs.		
	Nosema bombycis, source, mode of infection and transmission, cross			
	infectivity, prevention and control.			
14.	Bacterial diseases - causative agents, symptoms, factors influencing flacherie,	6 hrs.		
	source, mode of infection and transmission, prevention and control.			
15.	Viral diseases (grasserie, infectious flacherie, cytoplasmic polyhedrosis,	6 hrs.		
	densonucleosis and gattine) - causative agents- symptoms – sources, mode of			
	infection and transmission- prevention and control.			
	Unit-4			
16.	Fungal diseases: white and green muscardine and aspergillosis- causative	4 hrs.		
	agents- symptoms - structure and life cycle of fungal pathogen- mode of			
	infection and transmission- prevention and control.			
17.	Integrated management of silkworm diseases.	2 hrs.		
18.	Life cycle of Indian uzifly; seasonal occurrence; oviposition and host-age	4 hrs.		
	preference; nature and extent of damage; prevention and control; integrated			
	management of Indian uzifly.			
19.	Cocoon pests of silkworm: Dermestid beetle- life cycle; nature and extent of	2 hrs.		
	damage; Prevention and control measures.			
20.	Predators of silkworm: Cockroaches, ants, lizards and rodents; prevention and	1 hr.		
	control measures.			
21.	Brief account of methods of pest control: Cultural, mechanical, physical,	3 hrs.		
	legislative (Quarantine), chemical, genetical / autocidal, biological and IPM.			

# DSC – (SER) C: MULBERRY AND SILKWORM CROP PROTECTION

# Practical

# 16 Practicals of 4 hrs. each

1		<b>2</b> D	
1.	Study of powdery mildew, leaf spot and leaf rust through sectioning, staining	3 Prac.	
	and temporary mounting.		
2.	Study of root-knot nematode in mulberry.	1 Prac.	
3.	Collection, mounting/preservation of insect pests of mulberry (field work).	2 Prac.	
4.	Identification of mulberry pests. Study of nature of damage of the following	1 Prac.	
	pests: Leaf roller, Bihar hairy caterpillar, scale insect, mealy bug, thrips,		
	beetles, jassids and grasshoppers.		
5.	Study of pesticides, their formulation, applicators (sprayers and dusters	1 Prac.	
6.	Identification of different diseased silkworms based on external symptom	4 Prac.	
	(grasserie, flacherie, muscardine and pebrine). Identification of pathogens		
	associated with silkworm diseases: Staining and preparation of temporary		
	slides of bacteria, spores of pebrine, polyhedra of nuclear polyhedrosis virus		
	and mycelial mat/spores of muscardine.		
7.	Methods of application of silkworm bed disinfectants for management of	1 Prac.	
	silkworm diseases.		
8.	Life cycle of Uzi fly; Identification of uzi-infested silkworms and cocoons.	1 Prac.	
9.	Life cycle of dermestid beetles: Dermestid beetle infested silkworm cocoons	1 Prac.	
	and estimation of incidence.		
10.	Predators of silkworm.	1 Prac.	

## **SCHEME OF PRACTICAL EXAMINATION**

<b>Duration-3 hrs.</b> Q 1. Temporary mounting of any one of the following.		<b>Max. Marks - 40</b> - 10 marks
Leaf spot/ leaf rust/ powdery mildew/ root knot nema	atode of mulb	erry.
Note: Distribution of marks		•
a) Identification with binomial nomenclature	- 2	
b) Sectioning, staining and mounting	- 5	
c) Labelled diagram with description	- 3	
Q 2. Temporary mounting of any one of the following.		- 10 marks
Pebrine spore/ nuclear polyhedral bodies/ mycelia an	nd conidial sp	ores.
Note: Distribution of marks		
a) Identification	- 2	
b) Staining and mounting	- 5	
c) Procedure and diagram	- 3	
Q 3. Identify and comment on the spots A, B, C, D and E.		
Any FIVE from the practical syllabus.		- 10 marks
Q 4. Submission of field work / visit report.		- 5 marks
Q 5. Viva-voce.		- 5 marks

# **IV SEMESTER**

# DSC – (SER) D: PHYSIOLOGY OF MULBERRY AND SILKWORM

# Theory

	Unit –1		
1.	Absorption of water and solutes by roots; effect of external conditions; root	3 hrs.	
	pressure; ion exchange and active absorption.		
2.	Mineral nutrition- macro and micro nutrients; their physiological role.	2 hrs.	
3.	Transpiration: Significance; stomata- mechanism of opening and closing;	5 hrs.	
	regulation of water loss by stomata; factors influencing the rate of		
	transpiration.		
4.	Brief account of biological nitrogen fixation; types- importance in mulberry	3 hrs.	
	cultivation.		
5.	Biofertilizers, types and its significance.	3 hrs.	
	Unit-2		
6.	Biochemical composition of mulberry leaf	4 hrs.	
7.	Brief account of photosynthesis: Outline of the process; types of carbon	6 hrs.	
	fixation (C3 and C4); brief account of photorespiration and its significance.		
8.	Plant growth regulators: Importance and application in mulberry, agriculture	4 hrs.	
	and horticulture.		
9.	Role of environmental factors on mulberry growth.	2 hrs.	
	Unit-3		
10.	Developmental biology: Morphology and structure of silkworm egg,	4 hrs.	
	fertilization, cleavage, blastoderm, germ band formation, blastokinesis, eye		
	spot and blue egg; dispause development.		
11.	Digestion: Nutritive requirements of the silkworm, midgut structure and	4 hrs.	
	function. Structure and function of digestive system; digestive enzyme; process		
	of digestion.		
12.	Respiration: tracheal systems- spiracles, mechanism of respiration, factors	4 hrs.	
	affecting respiration.		
13.	Excretion: structure and function of excretory system and cryptonephrial	4 hrs.	
	arrangement and its significance in water regulation.		
	Unit-4		
4.	Neuro-endocrine system: Nervous system; Structure and distribution of	2 hrs.	
	endocrine glands; role of nervous system in endocrine function.		
15.	Sense organs: Photoreceptors, Chemoreceptors and Mechanoreceptors.	2 hrs.	
16.	Circulation: heart beat-role of alary muscles; accessory hearts; blood pressure	2 hrs.	
	in open circulatory system. Haemolymph.		
17.	Reproduction: Male and female reproductive systems in insects; role of	3 hrs.	
	accessory		
10	gland; oviposition.		
18.	Muscle Physiology: Histology of insect muscles, flight muscles in insects, ultra	3 hrs.	
10	structure of skeletal muscle, mechanism of muscle contraction.		
19.	Integument: Structure, formation and function.	2 hrs.	
20.	Metamorphosis- types of insect metamorphosis, theories of metamorphosis.	2 hrs.	

### DSC - (SER) D: PHYSIOLOGY OF MULBERRY AND SILKWORM

#### Practical

#### 16 Practicals of 4 hrs. each

1.	Determination of stomatal size and index	2 Prac.
2.	Kranz Anatomy in relation to photosynthesis.	1 Prac.
3.	Separation of leaf photosynthetic pigments of mulberry through paper chromatography.	1 Prac.
4.	Determination of water potential of potato tubers and osmosis.	1 Prac.
5.	Estimation of mulberry leaf moisture percentage and retention capacity of any two mulberry varieties.	2 Prac.
6.	Hill reaction.	1 Prac.
7.	Study of structure of silkworm egg. Mounting of 7 <sup>th</sup> , 8 <sup>th</sup> and 9 <sup>th</sup> day old embryos.	3 Prac.
8.	Mounting of spiracles and mouth parts.	1 Prac.
9.	Study of haemocytes in silkworm.	1 Prac.
10.	Determination of hatching fecundity and hatching per centage.	1 Prac.
11.	Mounting of larval skin, pupal chitin.	1 Prac.
12.	Mounting of body scales of silk moth	1 Prac.

#### **SCHEME OF PRACTICAL EXAMINATION**

#### **Duration-3 hrs.**

Max. Marks - 70 Q 1. Separation of photosynthetic pigments / water potential of potato tubers / Stomatal index / Estimation of protein in mulberry leaf. - 12 marks Note: Distribution of marks - 3 a) Procedure b) Labeled diagramme / Result - 6 c) To conduct Experiment - 3 Q 2. Estimation of haemolymph amylase/ succinate dehydrogenase / glucose / succinate dehydrogenase / Mounting of silkworm embryo  $(7^{th} / 8^{th} / 9^{th} dav)$ . - 12 marks Note: Distribution of marks a) Procedure - 4 b) Result / Mounting - 8 Q 3. Identify and comment on the spots A, B, C, D and E. Any FIVE from the practical syllabus. - 10 marks Q 4. Viva-voce. - 6 marks \_\_\_\_\_

## **V SEMESTER**

# DSE – (SER) A (1): MULBERRY & SILKWORM BREEDING AND SEED TECHNOLOGY

	Theory4 hrs/week x 16 weeks = 64 h	rs.		
1	Unit-1	0.1		
1.	Germplasm bank: Importance; collection, characterization and maintenance.	2 hrs. 1 hr.		
2. 3.				
	Mulberry breeding: Objectives; selection methods.	3 hrs. 4 hrs.		
4. 5.	Hybridization technique and selection. Polyploidy breeding and Mutation breeding.	$\frac{4 \text{ nrs.}}{2 \text{ hrs.}}$		
5. 6.	Breeding for disease and Drought resistance.	2  hrs. 2 hrs.		
0. 7.	Evaluation of selected genotypes and release of improved varieties.	$\frac{2 \text{ mrs.}}{2 \text{ hrs.}}$		
7.	Unit-2	2 ms.		
8.	Silkworm germplasm bank.	1 hr.		
<u> </u>	Sex determination mechanism in silkworm- importance of ZZ and ZW chromosomes- sex-	1  m. 1 hr.		
	limited races.			
10.	Gametogenesis- Oogenesis and Spermatogenesis	2 hrs.		
11.	Genetic of voltinism and moultinism in the silkworm, Bombyx mori.	2 hrs.		
12.	Silkworm breeding- inbreeding and out breeding concepts- objectives of silkworm breeding. Different types of breeding methods- selection, line breeding, cross breeding and mutation breeding.	3 hrs.		
13.	Heriditory traits of silkworm egg, larva, pupa and adult.	3 hrs.		
14.	Genetics of cocoon colours- inheritance of cocoon colours.	1 hr.		
15.	Heterosis/hybrid vigour-exploitation of heterosis in silkworm- concept of single, double and polyhybrids.	4 hrs.		
	Unit-3			
16.	Silkworm seed organisation, significance of seed organization; Basic seed multiplication centres-P4, P3, P2 and P1; Seed areas- identification; concept.	4 hrs.		
17.	Concept of selected seed rearers/villages- Seed Legislation Act- maintenance of seed crops.	2 hrs.		
18.	Seed cocoon markets- pupal examination, certification of seed cocoon lots- price fixation for seed cocoons.	2 hrs.		
19.	Disinfection and hygiene in seed production units.	2 hrs.		
20.	Seed production centres (grainages)- types of grainages- organisation and functions of grainages	2 hrs.		
21.	Plan for model grainage- grainage equipments and their use - Seed production plan.	2 hrs.		
22.	Procurement and transportation of seed cocoons- processing and preservation of seed cocoons-	2  hrs.		
22.	sex separation in seed cocoons.	2 115.		
	Unit -4			
23.	Moth emergence and 10 ynchronization; sex separation in moth; effect of improper 10 ynchronization on egg hatching and quality-safe duration.	3 hrs.		
24.	Coupling and decoupling; oviposition; method of egg production; refrigeration of male moths; mother moth examinations- individual and mass methods- dry moth examination; environmental conditions for grainage activity.	3 hrs.		
25.	Egg disinfection- handling of multivoltine eggs- preservation of eggs to postpone hatching-ideal embryonic stages for cold storage- maximum duration of cold storage. Handling of bivoltine eggs for early hatching- physical and chemical methods- hot and cold acid treatment.	4 hrs.		
26.	Postponement of hatching; hibernation schedule for 3, 4, 6 and 10 month's duration.	1 hrs.		
27.	Preparation of layings and loose egg- advantages- handling of loose eggs.	2 hrs.		
28.	Incubation of eggs-methods, environmental conditions required for incubation, postponement of hatching of eggs by temporary consignment.	2 hrs.		
29.	Grainage management-Role of LSPs. Bye products of grainage and their utilization.	1 hr.		

### DSE - (SER) A (1): MULBERRY & SILKWORM BREEDING AND SEED TECHNOLOGY

Practical 16 Practicals of 4 hrs		s. each		
1.	Mulberry germplasm and Mulberry multilocational trials (field visit)			
2.	Evaluation of breeding parameters in different mulberry varieties.	1 Prac.		
3.	Study of mitosis in onion root tip/mulberry root tip.	1 Prac.		
4.	Hybridization technique in mulberry.	1 Prac.		
5.	Study of meiosis in grasshopper and silkworm testis.	1 Prac.		
6.	Identification of different races of silkworm cocoons- NB <sub>4</sub> D <sub>2</sub> ,	1 Prac.		
	KA, PM, C.Nichi, Nistari, CSR <sub>2</sub> and CSR <sub>4</sub> race/ breeds characters.			
7.	Identification of mutants of silkworm larva- zebra, ursa, knobbed and sex-limited	1 Prac.		
	Races.			
8.	Comparative assessment of the hybrids and pure race cocoons.	1 Prac.		
9.	Model grainage plan and Grainage equipments.	1 Prac.		
10.	Seed cocoon processing/handling- deflossing, sorting and preservation- pupal	1 Prac.		
	examination and Sex separation of pupa and moth. Synchronization of emergence.			
11.	Moth emergence- selection of moths- pairing and de-pairing- oviposition- preservation	2 Prac.		
	of male moths- preparation of disease free layings- sheet egg and loose egg			
	preparation- Preparation of starch coated paper, washing of loose eggs, Drying-			
10	Treatment of eggs with acid-Weighing and packing.	1.5		
12.	Pupa and Mother moth examination for Pebrine spores- Individual and Mass moth	1 Prac.		
	examination- surface disinfection of silkworm eggs. Preservation and handling of			
10	hibernated eggs for 3, 4, 6 and 10 month hibernation schedules	1 D		
13.	Acid treatment of bivoltine eggs- hot acid and cold acid treatment. Incubation of acid	1 Prac.		
1.4	treated eggs-Calculation of hatching percentage.	2 D		
14.	Visit to Germplasm banks (CSGRC, Hosur / CSR&TI, Mysuru), Seed cocoon	2 Prac.		
	markets, commercial Grainage and cold storage center to know activities of cocoon			
	markets, preparation of layings and cold storage of eggs - Report submission.			

# **SCHEME OF PRACTICAL EXAMINATION**

Duration-3 hrs.	Max. Marks - 40	
Q 1. Evaluation of mulberry breeding genotypes.	OR	
Temporary squash preparation of mitotic of onion ro	ot tip / meiotic chromosomes of	
grasshopper testis / silkworm testis.	- 9 mark	ζS
Note: Distribution of marks		
a) Procedure	- 2	
b) Staining and preparation of chromosomes	- 4	
c) Identification of stages and labelled diagram	- 3	
Q 2. Assessment of cocoons of pure races or hybrids for c		
other racial characters/Estimation of heterosis/inbu	reeding depression 9 marl	ks
Note: Distribution of marks		
a) Assessment - 5		
b) calculations - 4		
Q 3. Cold / hot acid treatment of silkworm eggs / Pupa / M	Mother moth examination / Sex	
separation of pupal or moth stage / hatching perce	ntage 9 marl	ks
Note: Distribution of marks		
a) Procedure - 4		
b) Experiment - 5		
Q 4. Identify and comment on the spots A, B, C and D.		
Any FOUR from the practical syllabus.	- 8 mark	κs
Q 5. Submission of field visit report.	- 5 mark	ζS

# DSE – (SER) A (2): AGRONOMY AND AGRICULTURAL ENTOMOLOGY

# Theory

	Unit-I				
1.	Soil formation: Soil forming factors, influence of soil forming (weathering) factors and soil profile and classification.	4 hrs.			
2.	Properties of soil: Physical - structure, texture, colour, permeability, bulk and	4 hrs.			
	particle density and porosity; chemical - pH, electrical conductivity, organic				
	carbon, ionic exchange; biological – micro and macro organisms.				
3.	Soil water and air: Importance - physical and biological classification of soil water – soil moisture constants and drainage.	4 hrs.			
4.	Soil types in India. Problematic soils and their reclamation. Soil fertility and	4 hrs.			
	productivity. Soil sampling and soil testing.				
	Unit - II				
5.	Basic principles of crop production; classification of crops; methods of crop production; farming systems; planting seasons.	4 hrs.			
6.	Plant nutrient management: Essential plant nutrients - uptake and deficiency	6 hrs.			
	symptoms, organic manures, inorganic fertilizers and biofertilizers - importance,				
	classification and application; foliar nutrition, Integrated nutrient management.				
	Composting and vermicomposting.				
7.	Irrigation management: Sources, methods and schedules; conservation of soil	2 hrs.			
	moisture in dry land farming.				
8.	Weed management – methods. Farm management – principles and concepts.	4 hrs.			
	Unit - III				
9.	Characteristic features of insects. Insects in the service of man and insects as	2 hrs.			
	enemies of man.				
10.	Insect pests: Definition, origin, categories and types; pest forecasting and	4 hrs.			
	outbreak. Symptoms and injuries caused by insect pests; ETL and EIL.				
11.	Insect pests of agricultural crops: Cereals, pulses, oilseeds and stored grains.	6 hrs.			
	Insect pests of horticultural crops: Vegetables, fruits and plantation crops.				
12.	Insect pests of farm animals: Blood sucking flies, myiasis flies, lice and fleas;	4 hrs.			
	arachnids. Insect pests of public health importance - mosquitoes, houseflies,				
	sandflies, lice, bedbugs and ratfleas.				
	Unit-IV				
13.	Insect pest control: General considerations and prior information.	2 hrs.			
14.	Natural control of insect pests: Climatic factors, natural barriers, natural enemies and diseases.	4 hrs.			
15.	Applied control of insect pests: Cultural, mechanical, physical, biological, genetical/autocidal, legal, microbial, pheromonal, hormonal and chemical methods.	6 hrs.			
16.	Integrated pest management – goals, principles and concepts, components and benefits.	4 hrs.			

# DSE – (SER) A (2): AGRONOMY AND APPLIED ENTOMOLOGY

#### Practical

## 16 Practicals of 4 hrs. each

1.	Study of agricultural implements and machinery.	
2.	Soil sampling and testing.	1 Prac.
3.	Composting and vermicomposting.	1 Prac.
4.	Study of manures, fertilizers and bio-fertilizers, calculation of NPK dosage.	2 Prac.
5.	Study of nutrient deficiency symptoms in crop plants.	1 Prac.
6.	Study of drip and sprinkler irrigation systems.	
7.	Study of characteristic features of important weeds.	
8.	Collection and identification of insects belonging to orders: Lepidoptera,	
	Coleoptera, Orthoptera, Diptera, Hymenoptera and Homoptera.	
9.	Collection and methods of insect preservation.	1 Prac.
10.	Studies on life cycle of harmful insects: Agricultural and horticultural crops.	2 Prac.
11.	Studies on life cycle of harmful insects: Farm animals and public health.	
12.	Planning the facilities required for establishment of insectary. Production of bio-	1 Prac.
	control agents - insect parasitoids and predators.	

#### **SCHEME OF PRACTICAL EXAMINATION**

#### **Duration-3 hrs**

# Max. Marks - 40

Q 1. Collection and preparation of soil sample in the field / Calculation of fertilized	ers
requirement (as per recommended NPK dose) for a given area of irrigated	or rainfed
mulberry garden and given type of fertilizers.	- 10 marks
a) Procedure – 5 marks; b) Collection / Calculation – 5 marks.	
Q 2. Assign the given insect pests / parasitoids to their respective taxonomic grou	p and write
on their life cycle and importance.	- 10 marks
a) Identification – 4 marks: b) Life cycle and importance – 6 marks.	
Q 3. Identify and comment on the spots A, B, C, D and E.	- 10 marks
Any FIVE from the practical syllabus.	
Q 4. Submission of field work / visit report.	- 5 marks
Q 5. Viva-voce.	- 5 marks

# SKILL ENHANCEMENT COURSE (SEC) FROM SERICULTURE

# SEC – (SER) PAPER-1: SERICULTURE TECHNOLOGY

# Theory

# 2 hrs/week X 16 Wweeks = 32 hrs.

	Unit-1			
1.	Introduction to Sericulture-Origin and history of Sericulture. Components of sericulture.	1 hr.		
2.	Establishment of mulberry garden under rain-fed and irrigated conditions. Spacing.			
3.	Establishment of mulberry garden under rain-fed and irrigated conditions. Spacing. Package of practices for mulberry under irrigated and rainfed conditions.			
4.	Manuring: Soil sampling and testing, NPK requirements. Intercropping, composting.	2 hrs.		
5.	Irrigation: Importance, and methods. Conservation of soil moisture	1 hr.		
6.	Leaf harvesting: harvesting; transportation and preservation	1 hr.		
	Unit-2	3 hrs.		
7.	Fungal diseases of mulberry: Occurrence, symptoms and preventive and control measures of powdery mildew, leaf spot, leaf rust, root rot and stem canker.	3 hrs.		
8.	Root-knot disease of mulberry- occurrence, symptoms, preventive and control measures.	1 hr.		
9.				
10.	Minor pests: -nature of damage, preventive and control measures.	1 hr.		
	Unit-3			
11.	Rearing house: model rearing house. Rearing appliances.	1 hr.		
12.	Disinfection of rearing house and appliances; disinfectants, rearing and personal hygiene.			
13	Silkworm breeds for rearing. Incubation of eggs and black boxing.	1 hr.		
14	Chawki rearing: Brushing; optimum environmental conditions; methods and frequency of feeding; methods of bed cleaning; spacing; moulting and care during moult			
15	Late age silkworm rearing: Methods; optimum environmental conditions; feeding quantity and frequency; methods of bed cleaning; spacing; moulting and care during moult.	2 hrs		
16	Identification and mounting of spinning larvae; types of mountages and environmental requirements during spinning. Harvesting, sorting packing and transport of cocoons.	1 hr.		
	Unit-4			
17	Introduction to silkworm diseases. Protozoan disease – symptomatology, structure of pebrine spore, source, mode of infection and transmission, prevention and control	2 hrs.		
18	Bacterial diseases - causative agents, symptoms, mode of infection and transmission, prevention and control.			
19	Viral diseases (grasserie, infectious flacherie and cytoplasmic polyhedrosis)- causative gents- symptoms – mode of infection and prevention and control			
20	Fungal diseases: white and green muscardine and aspergillosis- causative agents- symptoms - prevention and control			
20.	Indian uzifly; life cycle, nature and extent of damage; prevention and control; integrated management			
22	Dermestid beetle - life cycle; nature of damage; prevention and control measures. Predators of silkworm: prevention and control measures.	1 hr.		

## VI SEMESTER

## DSE – (SER) B (1): SILK TECHNOLOGY, VANYA SERICULTURE AND EXTENSION Theory 4 hrs/week x 16 weeks = 64 hrs.

1	heory 4 hrs/week x 16 weeks = 6	4 nrs.			
	Unit-I				
1.	Textile fibres. Physical and commercial characteristics of cocoons: cocoon colour, shape,	2 hrs.			
	size, hardness, grain/wrinkle, weight of cocoon, weight of cocoon shell, shell ratio.				
2.					
3.					
5.	techniques- steam stifling. Hot air drying- Batch type and conveyer type.				
4.	Cocoon cooking/boiling: Definition and objectives, different methods of cocoon boiling-	2 hrs			
4.	Mono pan, three pan and pressurized cocoon boiling methods.	2 111 5			
5.	Cocoon brushing: Definition and objectives; methods of brushing.	2 hrs			
		2 hrs			
6.	Reeling water: quality required for silk reeling, hardness, pH; corrective measures.				
7.	Reeling: Objective; devices-country charaka, cottage basin, multi end reeling machine,	2 hrs			
0	auto and semi-automatic, improved CSTRI reeling devices.	0.1			
8.	Re-reeling and packing: Objectives, process; lacing, skeining, booking and baling.	2 hrs			
	Unit-II				
9.	Raw silk properties- physical, chemical and biological. Uses of raw silk.	2 hrs.			
10.	Raw silk testing and grading; Visual inspection. Mechanical tests; Supplementary tests-	3 hrs.			
	conditioning weight, scouring loss, exfoliation tests.				
11.	Silk throwing: Introduction, objectives; soaking, winding, doubling, twisting, rewinding.	3 hrs.			
12.	Silk weaving: Warp preparation, Weft preparation; pirn winding methods. Powerloom	3 hrs.			
	and handloom weaving. Flow chart of weaving; weaving defects .				
13.	Chemical processing of silk yarns and fabric: Degumming- methods. Silk bleaching; Silk	3 hrs.			
	dyeing-Acidic and basic dyeing processing; dyes and chemicals used for silk dyeing.				
14.	Spun silk industry- various steps involved, flow chart, spun silk yarn and noil yarn.	2 hrs.			
15.	Introduction to by-products of sericulture industry and their utilization.				
	Unit-III				
16.	Non-mulberry silkworms - their distribution in India and other countries and taxonomy	2 hrs.			
17.	Cultivation of Terminalia arjuna,, Machilus bombycina and Ricinus communis.	3 hrs.			
18.	Life cycle of Tasar, Eri and muga silkworms.	2 hrs.			
19.	Important diseases and pests of primary food plants and their management.	2 hrs.			
20.	Rearing of non-mulberry silkworms. Ecological conditions required- improved rearing	3 hrs.			
	methods for young and late age tasar, eri and muga silkworms. Mounting methods.				
21.	Seed cocoons- Procurement, preservation and production of disease free eggs.	2 hrs.			
22.	Diseases of non-mulberry silkworms- protozoan, bacterial, viral and fungal diseases.	2 hrs.			
	Symptoms- causative agents-preventive and control measures.				
	Unit-IV				
23.	Extension education- meaning ,objectives and importance, Principles and concepts	2 hrs.			
24.	Extension programmes- concepts and principles, role of extension personnel and farmers	2  hrs.			
	in programme planning Transfer of technology.				
25.	Communication- definition, types. Training- concepts and definition- methods	2 hrs.			
26.					
27.					
27.					
27.	Economics of egg production: Expenditure and income	2 hrs.			
28.	Economics of egg production: Expenditure and income Economics of silkworm rearing: Investment and returns. Economics of silk reeling: Cost and returns for different types of reeling establishments.	2 ms. 1hrs. 2 hrs.			

#### DSE – (SER) B (1): SILK TECHNOLOGY, VANYA SERICULTURE AND **EXTENSION**

#### Identification and fibre 1 Prac. 1. of silk. cotton, wool synthetic (viscose/nylon/polyester) by physical method- flame and microscopic test, chemical and confirmatory tests. Sorting of cocoons- calculation of percentage of each type. 2. 1 Prac. Cocoon stifling- different methods and determination of degree of drying. 1 Prac. 3. Reeling water: Determination of total and permanent hardness, alkalinity 1 Prac. 4. and pH. Determination of commercial characters of cocoon- cocoon wt., shell wt., 5. 1 Prac. shell %, average filament length, reelability, raw silk recovery, renditta and denier. Study of charaka, cottage basin, multi-end silk reeling machine. 1 Prac. 6. 1 Prac. Degumming of raw silk and estimation of sericin and fibroin percentage. 7. 1 Prac. Silk dyeing to obtain different shades using acid dye stuff. 8. Identification of different types of silk waste; floss, cooker, reeler, basin 1 Prac. 9. refuse and re-reeling waste, dupion silk. Taxonomic features of non-mulberry food plants (Terminalia arjuna, 10. 1 Prac. Terminalia catapa, Ricinus communis, Michelia champaca, Quercus sp., Bauhinia vareigata and Manihot utilissima). Life cycle and morphology of egg, larva, pupa, cocoon and moths of 2 Prac. 11. different nonmulberry silkworms. Non-mulberry rearing and grainage appliances and uses. Preparation of audio visual aids- Charts, handouts, pamphlets- film shows -1 Prac. 12. arranging and conducting of panel discussion with the rearers. 13. Presentation of statistical data - Bar chart and graph, pie chart of raw silk, 1 Prac. cocoon, area under mulberry cultivation, import and exports. 14. Visit to reeling units, filature, Power and handloom. 2 Prac. Visit to TSC, Research institutes and CRC's - Submission of report.

#### SCHEME OF PRACTICAL EXAMINATION

Durauon-3 nrs	<u>1ах. Магкs - 40</u>
Q 1. Estimation of filament length/ reelability/ raw silk % / renditta /denier (an	ny two) / from
the given cocoons / Sorting of cocoons / Estimation of fibroin and sericin %.	- 10 marks
a) Procedure – 5 marks; b) Experiment / Calculation – 5	5 marks.
Q 2. Any one of the following:	- 9 marks
Assign the given food plant of non-mulberry silkworms to its respective	family. Write
its sericultural importance / Estimation of sericin and fibroin from the Er	i cocoons.
a) Procedure – 3 marks: b) Experiment – 6 marks.	
Q 3. Prepare a photo chart on sericulture extension methods / Prepare an economic	omic model for
the production of silk from different reeling machines.	- 8 marks
Q 4. Identify and comment on the spots A, B, C and D.	- 8 marks
Any FOUR from the practical syllabus.	
Q 5. Submission of field visit report.	- 5 marks

**Practical** 

# 16 Practicals of 4 hrs. each

#### 40

# DSE – (SER) B(2): ENTREPRENEURSHIP DEVELOPMENT IN SERICULTURE

# Theory

	Unit-I	
1	Entrepreneurship development programme (EDP): Emergence and objectives of EDP,	
_	essential qualities to become an entrepreneur; selection of a potential entrepreneur.	4 hrs.
2	Planning for EDP: Objectives, selection of a centre, purpose of pre-training	3 hrs.
	promotional work.	5 111 8.
3	Follow-up for EDP: Need, extent and mechanism; facilitating follow-up; approach to	3 hrs.
	competence development.	5 111 5.
4	Project formulation (project appraisal): Meaning and purpose, personnel / agencies	
	interested in project appraisal, market feasibility of the project, technical and market	
	analysis, means of finance, profitability, risk analysis and liquidity management;	4 hrs.
	agencies supporting sericulture projects.	
5	Marketing: Approach and essence; market assessment - demand; steps involved in	2 hrs.
	market study.	
	Unit-II	
6	EDP in raising mulberry saplings (Kisan nursery).	3 hrs.
7	EDP in organization of chawki rearing centres.	3 hrs.
8	EDP in silkworm egg production and rearing.	3 hrs.
9	EDP in silk reeling – charaka, cottage basin and multi-end reeling units.	4 hrs.
10	EDP in preparation of handicrafts from cocoons.	3 hrs.
	Unit-III	
11	Mass production of insect pathogens: Culturing of hosts / preparation of culture	
	substrates, inoculation; isolation, purification and storage of pathogens.	4 hrs.
12	Mass production of parasitoids: Culturing of host insects, oviposition of parasitoids,	4 hrs.
	emergence, collection, feeding and storage of parasitoid adults.	
13	Mass production of insect predators: Culturing of prey insects, release of adults of	4 hrs.
	predators on the colony of prey insects, collection, feeding, storage of predator adults.	
14	EDP in composting and vermicomposting for the management of mulberry garden	4 hrs.
	and rearing wastes.	
	Unit-IV	
15	Mechanization: Objectives, principles, technology and productivity, characteristic	
	features, advantages and limitations.	3 hrs.
16	Mechanization in mulberry cultivation, silkworm egg production and silkworm	4 hrs.
	rearing - activities, scope and economics.	
17	Advances in silk reeling technology - activities, scope and economics.	4 hrs.
18	Contract farming and its scope in sericulture.	3 hrs.
19	Occupational health hazards in sericulture.	2 hrs.

#### DSE – (SER) B(2): ENTREPRENEURSHIP DEVELOPMENT IN SERICULTURE

#### **Practicals**

#### 16 Practicals of 4 hrs. each

1	Planning the facilities required for establishment of insectary.		
2	Observations on insect pathogens and symptoms.	1 Prac.	
3	Observations on insect parasitoids and predators.	1 Prac.	
4	Planning for raising mulberry saplings (Kisan nursery) and vermicomposting.	1 Prac.	
5	Planning for establishment of chawki rearing centers.	1 Prac.	
6	Planning for establishment of silkworm egg production centres.		
7	Planning for establishment silk reeling - charka, cottage basin and multi-end reeling	2 Prac.	
	units.		
8	Assessment of Benefit - Cost ratio under traditional and mechanized systems of	1 Prac.	
	mulberry cultivation and silkworm egg production.		
9	Assessment of Benefit - Cost ratio under traditional and mechanized systems of	1 Prac.	
	silkworm rearing and silk reeling units.		
10	Visit to units for mass production of parasitoids and predators.	2 Prac.	
11	Visit to grainage / silk reeling units to study the health related problems among the	2 Prac.	
	concerned personnel.		
12	2 Visit to chawki rearing centres.		
	A report shall be submitted at the end of the course for evaluation.		

#### **SCHEME OF PRACTICAL EXAMINATION**

### **Duration-3 hrs**

#### Max. Marks - 40

Q 1. Write on the EDP of Kisan nursery / silkworm rearing / egg production / silk reeling and its importance.
a) Procedure – 6 marks;
b) Importance – 4 marks.
Q 2. Prepare a project plan for establishment of chawki rearing centres (capacity: 10 Lakhs dfls brushing per year)
a) Requirements – 4 marks:
b) Plan – 6 marks

	• • • • • • •	0 1111110
Q 3. Submission of field visit report.		- 10 marks
